Dr. Jeffrey Stanley, Ph.D, Associate Professor of Psychiatry and Behavioral Neurosciences at Wayne State University, is seeking participants for a research study to look at the chemistry, function and structure of the brain in children with Attention Deficit Hyperactivity Disorder (ADHD), and children without ADHD.

The study uses magnetic resonance imaging or MRI to evaluate the brain.

**Requirements to Participate**

**ADHD participants:**
- Boys or girls 6 to 14 years of age
- Diagnosed with ADHD or suspect having ADHD

**Healthy Control participants:**
- Boys or girls 6 to 14 years of age
- No personal or immediate family history of psychiatric or mental illness

Financial compensation will be provided.
